### Data Science Specialist (training experience)

Yandex Practicum

12/2021 - 11/2022

- Solved practical tasks in the field of data analysis and machine learning (16 projects and 200+ SQL tasks).
- Study of the technological process of gold purification. Description: Application of a machine learning model for an industrial company that predicts the recovery coefficient of gold from gold-bearing ore. Technologies: Matplotlib, NumPy, Scikit-learn, EDA.
- Classification of comments. Description: the use of natural language processing to determine the toxicity of comments. Technologies: NLP, BERT, nltk, tf-idf.
- Determining the age of the buyer. Description: building a model that predicts the age of the buyer from a photo. Technologies: ML, CV, Keras.
- Determination of the most profitable oil production region. Description: construction of a model that determines the region with the most profitable production, based on the characteristics of wells in the regions. Technologies: Pandas, Scikit-learn.

### Owner / Manager / Developer / Analyst

tyulyagin.ru

02/2018 - 05/2022

*My personal website about economics, investments and technologies*

- Developed a website based on CMS Wordpress. Edited and optimized the site's template and engine using html, css, javascript, php. As a result, the loading speed of the site according to PageSpeed accelerated to ~ 1.5 seconds
- Wrote about 900 articles, including about 500 analytical articles and ratings on financial and economic topics, including research analysis of 300 companies on their pre-IPO prospectus
- Carried out SEO optimization of the titles, structure and content of the site. As a result, the attendance increased from 1k to 6k+ users per day during the year

### Owner / Manager / Developer / Layout Designer / SMM

Music YouTube channel "Klassnenkiy"

10/2010 - 05/2022

*The music channel "Klassnenkiy" and a platform for promoting aspiring artists on YouTube and online.*

- Created an Internet music channel "Klassnenkiy". Managed the project for over 11 years. During this period, about 1000 artists were attracted and more than 2500 musical works were placed
- As a result, an audience of more than 6 million subscribers was reached. The number of channel views is more than 700 million for all time
- The project's website has been developed on the Wordpress engine with a peak attendance of up to 12,000 unique users per day and more than 250,000 per month
